

We found out this morning that one of our Planning Board professionals had exposure to a person with a confirmed case of COVID-19 in their office. Although the professional has no symptoms, they have not yet been able to receive COVID-19 test results. In the absence of a negative test result, and in the interest of public health and safety, the Planning Board has determined to cancel the meeting tonight (October 13, 2020) and adjourn all scheduled hearings to the next regularly scheduled Planning Board meeting on October 27, 2020.
